

About Us

Hikvision Digital Technology

At Hikvision, we believe that close collaboration with our ecosystem of partners is needed to further accelerate innovation and development in the security industry, while also securing maximum value creation for clients.

We work in close partnership with hundreds of best of technical manufacturers of hardware and software systems in the security, automated manufacturing, and IoT industries. Our Technology Partner Program ensures that our clients can use Hikvision technologies knowing that we provide vendors with the tools to obtain comprehensive integration and compatibility with all our products.

Cloudview

PIONEERS OF CLOUD VIDEO RECORDING

Cloudview is a visual data platform that allows users to capture, store and manage visual data using the Cloud. It securely consolidates visual data from any number of CCTV systems into a unified, encrypted account held on secure Cloud servers – immediately accessible to you anywhere via a Google Chrome, Microsoft Edge or Safari browser.

Our next generation technology unifies, manages and securely consolidates smart triggered events from IP CCTV cameras in any location. In turn, this helps reduce costs, increase compliance, and remove uncertainty for our customers.

About Cloudview

Cloudview's video surveillance system ensures your visual data is managed and stored safely and securely in the cloud – all you need is a Google Chrome, Microsoft Edge or Safari browser and our encrypted edge device (CVR). The Cloudview web interface puts you in command of your data in real time. View single or multiple sites, live or historical footage, and "intelligently" identify specific events – chosen by you.

Cloudview utilizes existing infrastructure and equipment, eliminating the need for expensive and disruptive replacement. It unlocks the value of your current network by upgrading often fragmented deployments into a centrally managed, visual data framework.

Technical Details

Solution Type

- Cloud VSaaS
- Cloud Hosted Storage
- Vehicle Tracking System
- Retail Management Platform
- Health Care Application
- Sports Application
- Motion Detection People & Vehicles

Product Languages English
Regions Europe

Integrated Hikvision Products

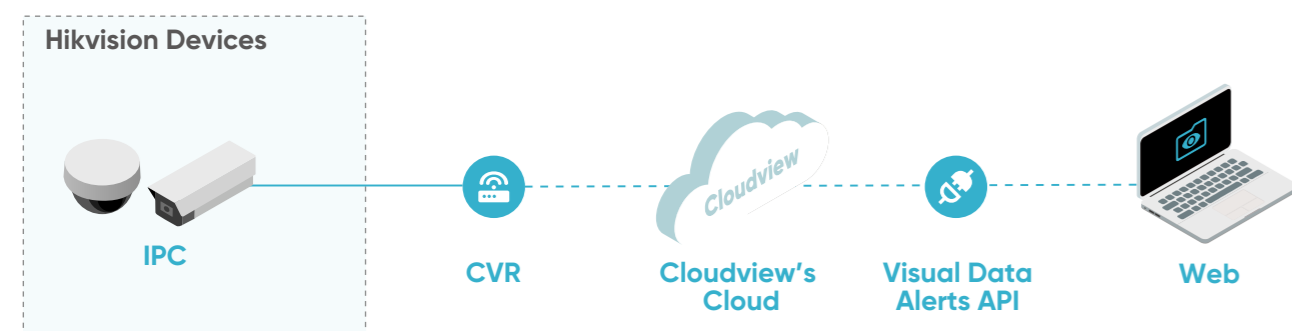

- ✓ IP Cameras
- ✓ PTZ Cameras

Supported Product Models and Versions

Cloudview platform (all versions) is compatible with all versions of Hikvision IP cameras and PTZ cameras

Integration Protocol ONVIF

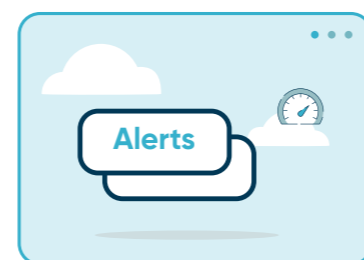

Solution Architecture

Key Benefits

COMPATIBLE

No special hardware or software required. Our technology works with virtually any IP camera and data is viewed via a single control console which works through your browser, from any location, 24/7.

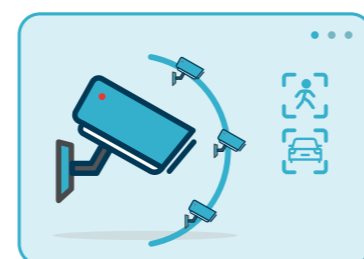

RESILIENT

Smart detection and real-time applicable analytics, alerts and schedules help maintain an active CCTV network and minimize system downtime. Time-consuming engineer call-outs and on-site checks are eliminated.

SECURE

World class bank-level encryption and frequent updates ensure the integrity and availability of visual data. All data processing is GDPR compliant and stored safely on AmazonWS datacenters, located in Britain, to help your business compliance.

FLEXIBLE

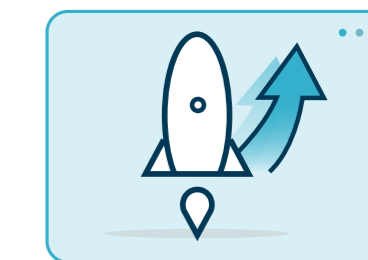

Highly configurable with recording and alerts of smart triggered, specified events. Integration of AI and scalable storage options support a single camera through to large scale, multi-site deployment for any size business.

QUALITY

Crisp HD visual data, optimized to work efficiently over any network from fiber to remote mobile deployments in environments with limited network coverage. Actionable events are easily identified and swiftly dealt with.

FUTURE-PROOF

Our operating platform continues to evolve; performance upgrades, technical enhancements and new features are automatically made available. On-site equipment upgrades are eliminated.

Key Features

Simple

- Easy to deploy, configure and control
- No software to install
- Works from any location
- Single control center

Secure

- Data is stored safely and is always accessible
- World class encryption
- GDPR compliant storage
- Real-time control 24/7

Smart

- Detect, record and upload specific actionable events
- Highly configurable
- Smart triggering
- AI integration
